

## **Is Your Practice Truly HIPAA Compliant—And Your Patient Data Secure?**

HIPAA regulations require annual training updates for employees. This course fulfills that requirement by providing a comprehensive review of compliance standards for safeguarding protected health information in dental practices. Special focus will be given to conducting security risk assessments and implementing effective security protocols to prevent data breaches.

### **Course Objectives:**

- Identify the responsibilities of dental practices under HIPAA regulations.
- Assess your practice's compliance with patient information security protocols.
- Implement strategies to strengthen security measures against emerging threats.
