

Is Your Practice Ready for an Emergency?

Healthcare facilities are facing an increasing number of emergencies that require a swift and coordinated response. Would your team know how to react in critical situations such as fires, medical emergencies, workplace violence, severe weather, or an active shooter event?

OSHA mandates that all workplaces have Emergency Action Plans (EAPs) to ensure preparedness, particularly for safe evacuation procedures. This course will guide participants through the essential components of an EAP, available tools for plan development, workplace risk assessment strategies, and training resources to help employers and safety coordinators implement effective emergency protocols. This course equips your practice with the knowledge and tools to respond confidently in any emergency situation.

Course Objectives:

- Recognize common emergency scenarios in dental practices.
- Understand OSHA requirements for Emergency Action Planning.
- Develop comprehensive emergency action plans using accessible resources.
- Assess and refine emergency plans through training and practice.
