

Want Successful, Productive, and Long-Term Employees? Onboard Them Effectively!

In today's complex work environment, new employees need a comprehensive orientation to your dental practice, including thorough training on practice protocols. This is especially critical for infection prevention and control procedures, and OSHA/HIPAA compliance. Effective onboarding is a multi-step process that ensures new team members become confident, competent, and productive in their roles. Discover what an effective onboarding process should include, how to streamline it using video and other media, and the importance of standard operating procedures and competency evaluations.

Course Objectives:

- Assess the current onboarding process to understand how new employees are introduced to their job tasks.
- Identify key components essential for an effective onboarding experience.
- Develop innovative strategies for training new employees.
- Equip new employees with the knowledge and resources for long-term success in their roles.
