

Maximizing Dental Practice Efficiency – Harnessing AI, Advanced Systems, and Cutting-Edge Equipment

Dental practices are facing growing financial pressures due to rising supply costs, staffing shortages, declining insurance reimbursements, and inflation. In this course, we will explore proven strategies to navigate these challenges, optimize efficiency, and boost overall productivity. The course will include live demonstrations of AI and selected equipment.

Course Objectives:

- Identify factors influencing productivity and profitability in dental practices
- Examine how AI can enhance business and clinical systems
- Explore the latest developments in clinical technology
